Series Firefly K

WALL MOUNTED

The Firefly series is the latest project of the Wrocław studio MIXD. The name refers to "glowing" insects - fireflies that add charm to July nights. Lamps in this series not only resemble the shape of magic skylights - they have a very elegant aluminum body, finished with a delicate glass shade - but like them, they offer unique, moody light. Lamps from the Firefly series are available in the form of a wall mounted, standing lamp and hanging lamp.
